- 78% Achieved 2 or more A*-C in Science
- 95% Achieved A*-C in English
- 88% Achieved A*-C in Maths

Exceptional Results Again 2015

Uffculme School students and staff are celebrating the best ever set of exam results as an astonishing 84% of the year group achieved the gold standard of 5 or more A*-C results including English and Maths in this year's GCSEs. These remarkable results are the culmination of five years of hard work and reflect students' outstanding commitment to their studies alongside the very positive relationships which they have built up with their teachers. Headteacher Lorraine Heath said "We are all absolutely delighted that these young people have done so well. They are without doubt the best results in the history of the school.

Despite a national context of rising grade boundaries and mixed messages around the validity of GCSEs, the students have secured outcomes which are truly exceptional. They prove that the powerful combination of a strong culture which values hard work and success, talented young people, determination and excellent teaching really does pay off. The results achieved this year exceed even our most ambitious projections and this is the fifth consecutive year that at least 80% of the cohort have achieved 5 or more A*-C passes including English and Maths. To maintain such high levels of performance while there is mounting pressure on the system to meet increasingly demanding standards is undoubtedly excellent. These students can be justifiably proud of their achievements, secure in the knowledge that they can now go on to do whatever they want.

As always there are some wonderful individual achievements: these include Susie Chappell with 11 A*, Isaac Hicks: 10 A*, Johnny Atkinson, Grace Barnes, Tom Snaith, and Emily Wright all with 9 A* and Pheobe Killen, Jade Richards and Lauren Stack all with 8 A* grades. In total there were 15 students who passed all their subjects with A* and A grades whilst nearly 30% of the cohort (51 students) achieved at least 8 passes at A and A*.
